

Clare, MI., October 5, 2021 – The GreenSeal® Alliance announces its newest member, Amer-Sil S.A. Amer-Sil has been designing and producing high performance micro-porous polymer/silica separators for all types of industrial lead acid batteries for over 50 years and is known in the industry also as a leading gauntlet supplier. Amer-Sil has an ongoing mission to make a significant contribution to ensuring a green future for generations to come. Mike Everett, Chairman of the Board of GreenSeal Alliance stated “Amer-Sil’s background and dedication to improve the sustainability of lead batteries will be a perfect addition to the GreenSeal Alliance. With each new industry member, the GreenSeal Alliance grows stronger, deeper and broader in skills and abilities.” Jan Peynsaert, Managing Director of Amer-Sil SA, added that Amer-Sil wants to be ready for the innovations coming to the lead acid battery and participating in the works on the bipolar battery design is an important part of it. Amer-Sil joins 21 other key players within the lead battery industry with a common goal, to promote and improve lead batteries throughout the world using GreenSeal® Technology.
